

The following Discrepancy was found in the original RFP for Medical Services for Clark County Jail.

Under Minimum Qualifications it reads: 1. The Vendor must be organized and existing for the primary purpose of providing correctional health care services and must currently have active contract relationships with at least two (2) county jails in the state of Ohio.

Under Mandatory Requirements and Objectives it reads: 2. All proposals must include list by name, location and administrator name (with phone number and address) of at least five correctional institutions where Vendor is providing medical care and length of time each contract has been in effect. This list will be used as a source of references for the Vendor.

Please be advised of the correct wording under Mandatory Requirements should read the same as Minimum Qualifications and be two (2) correctional facilities where Vendor is providing medical care and length of time each contract has been in effect.
